REPORT · Q3 2026

Quarterly Support Review

How ticket volume, first response time and customer satisfaction moved this quarter, and what we change next.

Support Operations 2 November 2026 Final

Summary

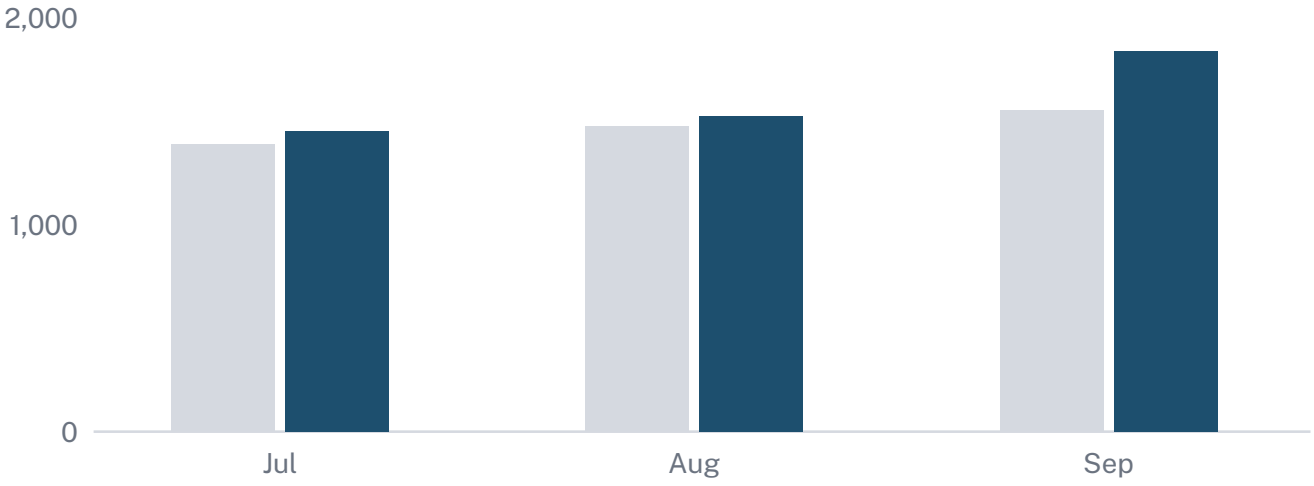

4,812
tickets, +9% on Q2

2 h 14 m
median first response

91%
satisfied customers

Ticket volume

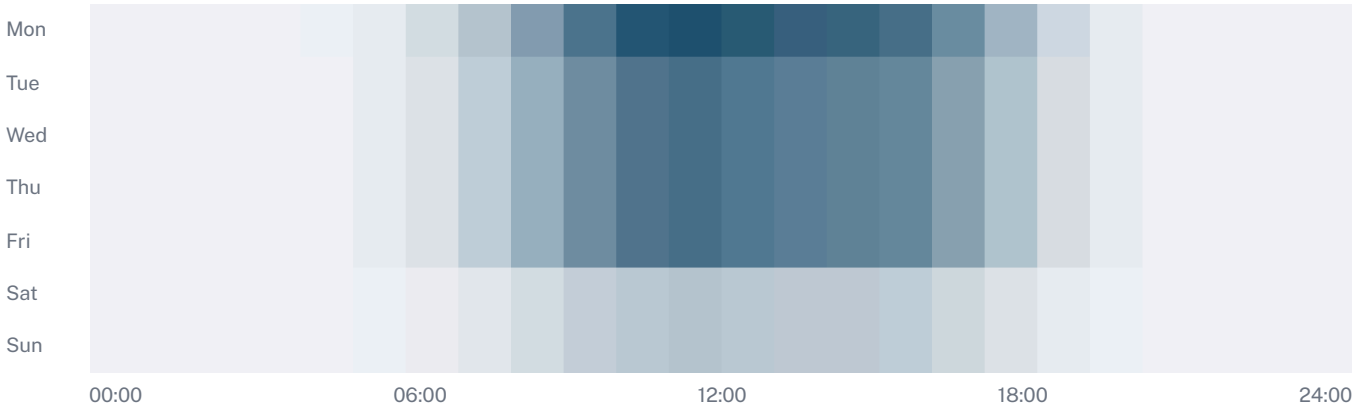

Volume rose in every month, driven by the September billing change. Weekday peaks stayed below staffed capacity.

Tickets per month. Light bars: same month last quarter. Dark bars: this quarter.

When tickets arrive

Arrivals cluster around 10:30 and again after lunch on weekdays. Monday mornings carry a quarter more volume than other weekdays, and weekends stay quiet.

Ticket arrivals by weekday and hour, Q3. Darker cells mean more tickets.

By channel

Channel	Tickets	Share	Median response
Email	2,406	50%	3 h 05 m
Chat	1,684	35%	0 h 06 m
Phone	722	15%	0 h 01 m
Total	**4,812**	**100%**	**2 h 14 m**

Email remains the slowest channel because tickets wait in a shared queue overnight. Chat response time held steady despite 22% more chats than in Q2.

Contact reasons

The three largest reasons are billing topics, together 33% of all tickets. Refund requests have the lowest satisfaction, mostly because refunds need a second approval.

Reason	Tickets	Share	Median response	Satisfied
Invoice not received	612	13%	1 h 52 m	88%
Payment failed	541	11%	1 h 10 m	84%
Change billing address	433	9%	2 h 40 m	95%
Login problems	398	8%	0 h 48 m	90%
Cancel subscription	355	7%	3 h 12 m	79%
Upgrade plan	301	6%	2 h 05 m	97%
Refund request	288	6%	4 h 20 m	74%

Reason	Tickets	Share	Median response	Satisfied
Export data	240	5%	2 h 55 m	93%
Add team member	214	4%	1 h 30 m	96%
API key reset	187	4%	0 h 35 m	94%
Notification settings	162	3%	2 h 50 m	95%
Other	1,081	22%	2 h 30 m	92%

Satisfaction

91% of customers who answered the survey rated their contact as good or very good, up from 89% in Q2. The response rate was 31%.

What customers praised

- Fast chat answers, often within five minutes.
- Agents who solved the problem without a handover.
- Clear follow-up emails with the next step spelled out.

What customers disliked

- Waiting overnight for an email answer.
- Refunds that take more than a week after approval.
- Repeating account details after a transfer between channels.

Staffing

The team worked 2,940 agent hours this quarter, 6% more than planned, because two new agents shadowed for their first four weeks. Overtime was limited to the first week of September.

Month	Planned hours	Worked hours	Tickets per hour
July	920	948	1.53
August	920	962	1.58
September	930	1,030	1.79
Quarter	**2,770**	**2,940**	**1.64**

Recommendations

Decision needed: move one email agent to chat during the billing peak in the first week of each month.

1. Send invoices two days before the billing run, so "invoice not received" tickets arrive spread out.
2. Give team leads authority to approve refunds under €100 without a second approval.
3. Carry the account context across channel transfers in the help desk.
4. Start an early shift at 07:30 on Mondays to absorb the weekend email backlog.

Method

Figures cover all tickets created between 1 July and 30 September 2026, excluding spam and duplicates (312 tickets). Response time is measured from creation to the first human reply, in business hours. Satisfaction comes from the one-question survey sent after a ticket closes.
